INTRO

For over a century, CARL WALTHER has set new standards in the design and manufacture of law enforcement firearms. Working closely with German police firearms experts, the company’s products have been produced to the most stringent standards. Safety and quality are the true tests of a police firearm. CARL WALTHER uses the experience we have gained in the law enforcement market to develop products for the police and competition markets. WALTHER sporting weapons have been the competitor’s choice in international competition ever since they first appeared in the Olympic Games.

In 1993, a new chapter in the rich WALTHER history was written as WALTHER merged with the UMAREX Corporate Group. This merger was the cornerstone for the worldwide success of the WALTHER brand, and the continued growth of the WALTHER name.

One sign of this growth is the new manufacturing facility being constructed on the original operating site near Ulm, Germany. This factory, scheduled to be completed here by mid-2005 will be more than 5,000 m or 54,000 sq. ft. of floor space, providing room for modern equipment, training facilities and police firing ranges. The weapons of tomorrow are becoming reality today, due in large part to our investment in the future.
WALTHER has forged strategic alliances with several strong partners in an effort to achieve greater success in the international law enforcement market. WALTHER police pistols must meet the highest standards of quality with unsurpassed fit, finish, reliability and durability. Law enforcement professionals have provided assistance in developing our product specifications in order to meet the needs of today’s police officer.

WALTHER has partnered with another recognizable firearm brand, Smith & Wesson to manufacture the Smith & Wesson SW99 line of pistols. Based on the proven WALTHER P99 platform, WALTHER and Smith & Wesson have been co-producing the P99 for four years. Smith & Wesson is also under license to manufacture the legendary WALTHER PPK and PPK/S pistols. An alliance has also been formed with the “Fabryka Broni”, another partner with a long manufacturing tradition. There the WALTHER P99 is manufactured too as a custom-made co-produced pistol to serve the Polish law enforcement market.

CARL WALTHER continues its long tradition of technical expertise in the design and production of firearms, and the worldwide recognition of the WALTHER brand name.
Tradition of Innovation

The highly successful P99 Series was developed in conjunction with technical experts from a number of law enforcement agencies. The result is a state-of-the-art product line, designed for use in modern police tactics. The P99 series offers the law enforcement professional a number of special features and various trigger mechanisms to meet the agencies needs. The line includes both full size and compact models for both uniform and undercover use.

The P99 Series is the only hammerless pistol available to offer three trigger options:

P99 AS  Anti Stress
Traditional double action and single action modes, and the added feature of the anti-stress trigger position which is engaged after reloading.

P99 DAO  Double Action Only
The striker is at rest with no preload for a long smooth trigger pull. The pull is consistent in length and force from the first shot to the last.

P99 QA  Quick Action
Partially preloaded striker provides a uniform short light trigger pull. This variation is a favorite among many sportsmen and police tactical units.

Internal firing pin lock with many advantages
- No external hammer to snag on clothing or other object while drawing from a holster
- No external parts to be damaged in the event of accidental dropping
- Fewer parts for reduced weight and size
- Modular design for easier maintenance
- Quick trigger reset for faster shooting speed
- Easy field-stripping without the need for external tools
- No external safeties necessary for quicker drawing

Compact versions
All the trigger mechanisms are also available in the P99 C compact versions. The compact has all of the same features and options as the full-size pistol. One fire control system can outfit the entire department reducing training expenses for the law enforcement department.

Use
Both left-handed and right-handed shooters will appreciate the ambidextrous controls of the P99. The slide stop, magazine release and decocking button can be operated easily by all shooters, without the need to reposition the pistol in your hand.

Quality
A special Tenifer finish is applied to all external part surfaces to provide an extremely hard and durable surface, resistant to wear and abuse.

Maximum safety
Each P99 is inspected and tested to insure it meets the rigid standards set by the German police. The legendary WALTHER quality guarantees the user safe and reliable operation each and every time.
Quick Action
Trigger mechanism: Pre-cocked striker system

The P99 Quick Action, with its uniform short trigger pull is the pistol of choice for both law enforcement tactical teams and competitive shooters.

The P99 QA is easy to use with its repetitive trigger pull and with its four independent safeties; the P99 QA is one of the safest pistols available today.

Lightning-fast firing
The Quick Action trigger system: The striker is partially pre-cocked and when the trigger is pulled, the striker is fully cocked and released, firing the pistol. The trigger travel is approximately 8 mm with a trigger force of approximately 3,800 grams. This short pull with its quick reset provides quick shot delivery especially in competitive situations.

Disassembly
The P99 QA is the only hammerless pistol with a partially pre-cocked striker capable of being disassembled without the need to pull the trigger. Simply remove the magazine, clear the chamber, press the takedown button, pull down the takedown catch and remove the slide.

Elongated ambidextrous slide stop
optional with the P99 QA model

WALTHER AROUND THE WORLD

WALTHER firearms are in service in Canada as well. The Montreal Police have adopted the P99 Quick Action.
P99 QA
268 16 41 cal. 9 mm
268 18 38 cal. .40 S&W
Standard design with plastic rear sight, single-sided slide stop lever

P99 QA
266 28 33 double-sided slide stop cal. 9 mm
Law enforcement design. With steel rear sight and ambidextrous slide stop

P99 QA Titanium
268 95 02 cal. 9 mm
268 95 70 cal. .40 S&W
The distinctive appearance of the silver-gray titanium coating provides superior resistance to abuse and corrosion
Anti Stress

Trigger mechanism:
Traditional Double Action with an Anti Stress mode

As the first pistol equipped with a firing pin lock, the P99 AS combines the advantages of the traditional Double Action System with Single Action Anti Stress trigger. The P99 provides the shooter with a user-friendliness previously found only in hammer fired pistols.

Extended trigger excursion

The anti stress trigger makes the P99 one of the world’s safest firearms by preventing unintentional “reflex” firing in stressful situation. The decisive innovation: When the slide is racked completely to the rear upon loading, the trigger remains in the forward position for the first shot; not only in the double action trigger mode, but also in the single action mode. The trigger travel is 14 mm long in the anti stress mode (at 2,000 g trigger force), preventing inadvertent firing. On all subsequent shots, the trigger travel is reduced to 8 mm (at the same trigger force) and this permits firing in rapid sequence, due to the quick reset of the P99 trigger.

Enhanced safety

The P99 AS is equipped with a decocking button to safely decock the striker. It acts as an automatic safety and cannot snag on clothing even if the gun is drawn quickly, because it is integrated directly into the slide.

«Between 2001 and 2003, the Polish Police conducted extensive testing and selected the WALTHER P99 Anti Stress with Double and Single Action triggers for duty use. The P99 AS is the perfect package to ensure full reliability for law enforcement use.»

Decocking lever allows safe decocking of the striker

Trigger Pull N (+– 2 N)

- Single Action - Anti Stress Trigger
- Single Action
Double Action Only

Trigger mechanism: Double Action Only

The Double Action Only trigger mechanism in the P99 guarantees a consistent trigger force of approximately 3,800 g with a trigger travel of 14 mm, from the first shot to the last. The striker of the P99 DAO is always in the at rest position with no pre-load.

Safe handling

Three built-in safety systems insure that a shot can be fired only if the trigger is intentionally pulled completely to the rear.

The weapon can be safely holstered after the shot.

No additional steps are required; and no additional safeties need to be engaged.

This safe and simple design concept reduces training time and effort and has convinced an ever-increasing number of users that the P99 DAO is an ideal trigger system.

All P99 DAO pistols come standard with both an ambidextrous slide stop, and steel rear sights.

Denis Renaud

FIREARMS INSTRUCTOR
QUEBEC CITY POLICE

«The P99 DAO has replaced all the revolvers previously used. The low amount of training required, the safe DA Only trigger, excellent ergonomics and highly reliable functioning were what convinced us.»

Elongated ambidextrous slide stop
Standard in the P99 DAO
The compact pistols for concealed carry

Today's trend is toward pistols that are compact in design and light in weight, yet have all of the features that the law enforcement professional is seeking.

System identical with the full size models

The P99 compact has the same highly advanced design features of the full size P99, but in a size that is designed for concealed carry. Just like the full size version, the compact P99 is available with same trigger variations including the QA, AS and DAO. The frame backstraps are interchangeable so that the pistol will fit in a wide variety of hand sizes. The pistol will not snag in clothing when it is drawn, thanks to rounded edges. The hammerless striker system and safety devices integral to the P99 are also available in the P99 compact.

All the compact versions are delivered, as standard equipment, with a flat-bottom magazine butt plate and a finger rest magazine butt plate. The frame is molded with a Weaver-style rail to accept lights and lasers.

The new P99 compact is the ideal compliment to the P99 full size line of pistols. Perfect for concealed carry or as a backup weapon for law enforcement.

P99 Compact AS

With the Anti Stress SA/DA mechanism, the P99 compact AS can be loaded and carried decocked. In this mode, the P99 compact provides a double action first shot followed by a shorter lighter single action second shot.

P99 Compact DAO

Like all DAO models, the P99 C comes standard with steel sights and ambidextrous slide stop. The DAO trigger ensures maximum safety and is ready for immediate firing in a self-defense situation.

Often imitated but never duplicated: The elegant lines of the legendary WALther PPK have caught the imagination of the entire world for nearly 75 years. Developed in 1931, the WALther PPK continues to thrill the shooting public, and the legend lives on. The PPK/S, with a longer frame for one additional cartridge, and the PPK are now both produced in the USA, under licence.

**PPK and PPK/S features**
- Firing pin safety
- Manual safety with decocking function
- Double Action and Single Action trigger
- Extended beaver tail

**Action & Fun**

Whether you are looking for a pistol for affordable training or simply the excitement of shooting, the P22 is the pistol for you. The WALTHER P22 is fascinating in its compact size, while still maintaining all of the features of a full-size pistol. Constructed using a modular manufacturing concept, the P22 offers several different equipment configurations. The barrel can be changed out or a red dot sight can be mounted — almost instantly.

**Features of the P22**
- Interchangeable frame back straps create an ideal fit to the shooter’s hand
- Compact design and light-weight are achieved by a modern polymer frame (just 480 g, including the magazine)
- Traditional double-action operation
- Ambidextrous controls for both left and right hand shooters
- Integrated trigger lock, loaded chamber indicator
- Magazine disconnect, hammer safety and firing pin safety for safe and reliable operation
- Modern, eye catching high tech design
- A fixed barrel for incredible accuracy
- Windage adjustable rear sight and elevation adjustment with interchangeable front sights for variations in shooter operation
- Interchangeable barrel (sold separately) can convert the P22 from the standard configuration to the target version in minutes.

The P22 Target uses the same technology as the P22 Standard, however the barrel length is now 127 mm / 5” (therefore extending the line of sight by 40 mm). The longer sight radius provides for more concentrated aiming during target shooting, ergo resulting in better scores. The P22 Target also is equipped with a barrel weight / non functional compensator.
Loaded chamber indicator
The notch on the top of the barrel shows whether a cartridge is in the chamber.

Magazine release
Molded to the same contour as the trigger guard, prevents the magazine from being unintentionally released from the weapon. The ambidextrous magazine release can be operated equally well by either right or left-handed shooters.

Back strap and magazine butt plates
Two interchangeable grip back straps, and two different magazine butt plates, allow for customization based on the shooter’s hand size.

Integrated lock with key
A specially designed key locks the trigger in the P22 and thus prevents use by unauthorized persons.
Perfectly matched accessories
WALTHER offers an extensive line of accessories for the P22, allowing the user to equip the P22 to suit the individual needs. The same high quality that goes into the production of each P22 also goes into each P22 accessory.

Red-dot sight TOP POINT II
267 61 50 red-dot sight
The intensity of the dot can be regulated in 12 settings. Includes Weaver-style scope rings and dust caps

Bridge mount with Weaver-style rail
265 93 28
Fits the WALTHER Top Point II red-dot sight. Can be easily attached to the Weaver-style rail on the P22 frame

Silencer SD22
267 61 33 (not available in the USA)
Dry silencer developed especially for the P22, with attenuation exceeding 20 dB. The silencer can be mounted or removed almost instantly using the barrel adapter supplied. Dimensions: 155 x 27 mm. Weight: 205 g

Conversion unit Target
265 93 01 cal .22 l.r.
The P22 Standard with its short barrel can be converted to a Target version with a 127 mm match barrel and barrel weight. This change can be performed in seconds

Conversion unit Standard
265 92 98 (not illustrated) cal .22 l.r.
Makes the conversion from the Target into the Standard version possible

P22 Holster
266 90 72 Pancake holster, leather (not illustrated)
266 90 81 Universal holster, leather (not illustrated)
267 09 09 Paddle holster, Kydex (not illustrated)
267 09 17 Belt holster, Kydex (not illustrated)
267 61 76 ABS case, black (not illustrated)

P22 Set I with red-dot and silencer
267 42 03 10 shots cal .22 l.r.
The barrel adapter permits quick attachment and removal of the specially-designed silencer. Thanks to the bridge mount and the Top Point II red-dot sight, precise shooting is possible even with the silencer attached. Includes silencer, barrel adapter, interchangeable target barrel with barrel weight, Top Point II red-dot sight with scope rings, bridge mount and polymer case (not available in the USA)

P22 Set II with red-dot
267 42 11 10 shots cal .22 l.r.
Includes all items in set I, except the silencer

P22 Set III with laser
269 28 21 10 shots cal .22 l.r.
P22 with 3.4” barrel and factory installed WALTHER quick-release laser, targeted for 15 m

All the sets are mounted and calibrated at the factory.
WALTHER laser for the P22

269 28 30

The laser was developed especially for the P22 and is designed to be a perfect fit. The quick-release catch allows the laser to be mounted or removed instantly without the need for additional tools. LEDs on either side of the laser, illuminate indicating that the laser is on.

SETS
Semi Auto Rifle

WALTHER continues its long-standing tradition of manufacturing small-bore rifles that have won numerous gold medals in the Olympic games and at World Championship matches with the introduction of the new WALTHER G22.

The WALTHER G22 employs an innovative “Bullpup” design for the first time on any WALTHER rifle. The G22 with its full line of accessories is a utilitarian rifle for hunting, competitive shooting, or just plinking.

G22 details

- Fire control and magazine integrated into the rear of the stock
- This gives an extremely short overall length of 720 mm in spite of the optimal 508 mm barrel length
- The first small-bore rifle in this class available in a genuine left-hand version
- Variable-length stock for a custom fit to the shooter. A 20 mm extension is included
- Adjustable sliding sights
- Weaver-style universal rail at the sight mount to accept optics
- Weaver-style universal rail at the front sight mount to accept the WALTHER laser
- Weaver-style universal rail at the forearm for a bipod or other accessories
- WALTHER Safety Package provides a maximum degree of safety during use and when in storage. Consisting of a slide safety, cocking indicator, magazine safety and integral lock to protect against unauthorized use.

Slide safety
The ambidextrous safety is in a convenient location for use and easy accessibility. Two tabs are clearly visible, even when the weapon is raised, indicating whether the safety is engaged.

Integrated lock
The internal lock is located next to the slide safety and can be used to lock the rifle. The key is identical to the key for the P22 pistol.
Cocking indicator
The red indicator in the fire control housing indicates whether the rifle is cocked.

Magazine disconnect (not illustrated)
Prevents firing with the magazine removed.

Magazine release
Integrated into the stock; permits rapid magazine exchanges. An additional magazine is located in the stock.

Multi-functional
Weaver-style rails, mounted on the forearm and front sight mount in the standard configuration, permit the attachment of lights, lasers, a bipod or other accessories. The non-slip, soft touch pads aid in properly positioning the rifle.

Sliding rear sight
Located in the carrying grip for protection, the sliding rear sight is activated only as required.

Weaver-style rail
For mounting of various aiming devices.
Laser for the G22

Developed by WALTHER especially for the G22, the high-power laser diode is designed to function as an integral part of the rifle. The LEDs on either side of the laser unit indicate the operating status. The laser is securely mounted on the Weaver-style rail, below the front sight mount with the help of two horizontal studs – for maximum accuracy and durability.
